

Foreword

This song book contains both the lyrics and guitar chords and acetate masters to all the songs featured on the CD "With Faith". Our hope is that these will assist those of you wishing to use the songs in your own churches or groups. If you have a CCLI Licence your use of these songs is covered under the terms of that licence. If, however, you do not possess such a licence and wish to make use of the resources contained within this book then you will either need to purchase the appropriate licence or contact the publishers to obtain the relevant permission. For your convenience, the appropriate addresses can be found on the back page.

These songs represent a small snapshot of what God is doing in our lives and in the life of our church, St Martin's, Hull. Because they are relevant to us they have deepened our worship of Him and spoken to us in new ways. We would encourage you, if you are involved in leading worship, to have a go at writing your own songs if you do not do so already so that God may speak to you through your own experiences. We thank God that we have been able to share some of ours with you.

Note: We often play this song in A as it is easier for most people in this key. If you are unable to transpose, try placing a capo on the second fret and play the chords as above.
